Saturday

Dear George:

Was glad to hear from you and know that all's well. Spoke to Florence yesterday evening, and everything is fine. Her occupation with Jimmy is her only relief from her lonesomeness.

Richard has been transferred back to the infantry, and reports to his old regiment at Camp Swift on Monday. Sudden as was that news, we were always expecting it, although hoping against it. His wife is going to remain in San Antonio for a week, until they know more definitely what is in store for them. My nephew is still undergoing x-ray tests to determine a definite diagnosis, although the doctors still lean to the tumor theory. Will probably know more tomorrow, when we expect a call from his folks.

The offensive on the Italian front recreated invasion jitters, making the market nervous, although the reaction is within bounds. IT is 13 1/8; LS 16 and MCK 23. They may go fractions lower, but I expect the whole list to zoom shortly.

Let me know if there is anything I can do for you. Sorry I couldn't get to the station. We were at the Astor at 4:30 but it poured so heavily we couldn't leave the hotel till five. My best and loads of good luck.

Sincerely,
May

Saturday

Dear George:

I am glad to hear from you and that the wife is well. I hope to Florence yesterday evening, and everything is fine. Her occupation with the baby is her only relief from her loneliness.

Norman has been transferred back to the infantry, and reports to his old regiment at Camp Swift on Monday. Gordon is not here, so we are always expecting it, although hoping against it. His wife is going to remain in San Antonio for a week until they can move definitively west as in some form. My nephew is still undergoing x-ray tests to determine a definite diagnosis, although the doctors will lean to the tumor theory. I'll probably know more tomorrow, when we expect a call from his folks.

The offensive on the Italian front restarted invasion jitters, making the market nervous, although the reaction is within bounds. It is 12 1/2; 13 1/2 and 14 1/2. They are to fractions lower, but I expect the whole list to soon stabilize.

It is now 11:30 and I am writing I am so sorry. Sorry I couldn't get to the station. We were at the station at 11:30 but it proved so heavy we couldn't leave the hotel till five. My best and loads of good luck.

Sincerely,

MLPincus,
