

Friday aft. 4th 1904.
May 19th 1904.

Dearest beloved,

The sun is shining brightly, it's slightly cooler day and Jimmie and I are now on the campus grounds, one side. Jimmie is having one good afternoon watching the tennis players, shouting at them in his baby talk and running hither, thither and yon. He'll probably be the B'lyer College mascot if we visit here more often and the pay off is when he has to make "sis." I take him with his seat to the ladies lavatory in the library building and you can imagine how those college girls laugh when I walk in with him and they all think he's a girl. We can take it and I really get a kick out of his cute ways and his friendliness.

2

If I hadn't mentioned that his week-
-along is increasing hourly, it has. The
-now says quite clearly - more - more -
-sis, fly, clock, bread, oh key and
-oh boy.

Had a good night's rest, went to sleep
at 9.30 and awakened at 7 o'clock. Baby
was up soon after, had breakfast and
then I went down for the mail. Your
Wednesday letter came today, some
snapshots and also a letter from the
Intellibond saying that the matter was
being taken care of and I was not to
answer any questions asked by anybody
in reference to the incident. Enclosed
find the only 2 good snaps and the
rest of them didn't come out. That's
our feeding camera again.

How are you, my darling corporal?
So they have you doing 3 jobs for the
266 a month - almost like your old

3
offic. job in N.Y. Did your 1st Sgt
ever get those cigars?

Baby and I miss you so much,
think of you continuously and still
love you so dearly. Why doesn't it all
end soon so we can live happily
as we should? The folks are fine,
I hope to them this afternoon and they'll
be here Sunday when you call. Last
night I spoke to Sonny and Addie, who
read their best to you and Addie will
answer your letter this week, he says.
I asked about any new news of Joel
and Sonny said that he's improved
quite a bit, got all the necessary
medical attention for 5 weeks and
Joel's condition is much better than
they expected. All this information she
got from the lead doctor while at
the hospital. Meanwhile Thelma keeps
in touch with Dr. Bremer and will
take Joel to Dr. Segal on Flatbush

and J. for further treatments. This doctor is head of the Cony Co. Hospital and specializes in kidney ailments. Dr. Becker is the surgeon on the case.

Betty came in for a visit and later July. They send their best and are well neighbors. Jules called today and I inquired about the car covers. The man who made them is now doing deferral work and ^(Jules) he may get the material if I can have them made to order. I'll let him know if I decide.

The war news has been very good the past 2 days and so many people tell me that even over 30 are not being shipped so I'll make cheerful again.

Take care of yourself, my sweetheart, and remember I always love you. Jimmie and I do kiss and hug each other for you so many times each day. Until to-morrow
Goodnight, Pleasant dreams. Yours always
Frank
