

On rifle pits front of the enemy
Four miles south of Sammamish river
Homer Co (Wash) W. June 1st 1846

Dear Friends at Home:

I have just received this afternoon your welcome letter of May 22 & also James' letter of some date and two papers. I got the paper sent to Alden here in the Hospital in R.I. I suppose I am much obliged for the papers you sent. I am well, so I can expect, considering what we have been through. We have been skirmishing or supporting skirmishes digging rifle pits & marching continually night & day ever since I wrote you last frequently marching all day and all night & skirmishing the following day. So you see we have a great deal of sleep which with the rather short rations caused by the sudden change of base of supplies the hard marches and hot weather has almost worn us out. But I am surprised to see with what true grit & courage the boys

In rifle pits front of the enemy
Four miles south of Pamunkey river
Hanover Co. (I guess) Va. June 1st 1864

Dear Friends at Home:

I have just received this afternoon your welcome letter of May 22nd also James' letter of some date and two papers. I got the paper sent to Alden he is in the Hospital in RI I suppose I am much obliged for the papers you sent I am well as I can expect considering what we have been through. We have been skirmishing or supporting skirmishers digging rifle pits or marching continually night & day ever since I wrote you last frequently marching all day and all night & skirmishing the following day

So you see we loose a grat deal of sleep which with the rather short rations caused by the sudden change of base of supplies the hard marches and hot weather has almost worn us out. But I am surprised to see with what true grit & courage the boys all

at night the work all seems to be resumed to
what the rebels this time and all are reconcentrated
As a long campaign I should think it a task for
old Lee to put back of Grant & his army for 22
miles on to one position, save the rebels much by
march & force them from one position to
another each man throwing up rifle pits
& earth works all the time threatening the
enemy till they get well fortified then we
should be some night taking the rebels by
surprise at their own works & cause the first
thing following day know we have a good
position

Morning June 2d

Having to keep firing on our right
I had not time to finish my letter
last night. This morning at day
light we were met by our position
and are meeting. I would like to
have James send me Carllons
account of the battles.

But the mail goes now
I send \$3.00

stuck to the work all seem to be resolved to while the rebels this time and all are reconciled to a long campaign I should think it a task for old Lee to keep tract of Grant & his army for we rush onto one position drive the rebels inch by inch & force them from one position to another each move throwing up rifle pits & earth works all the time threatening the enemy till they get well fortified then we skedaddled some night leaving the rebs to look at their own works & ours The first thing Johnny reb knows we have a position

Morning June 2nd

Oweing to heavy fireing on our right I had not time to finish my letter last night This morning at day light we evacuated our position and are resting I would like to have James send me Barttons account of the battle

But the mail goes now

I send \$3 00
