

June 24, 1941.

Dear Florence:

I was glad to see from your card that you finally got away and that all seems to be well. And any complaints you may have had about the weather are no longer so, since the weather must have turned right even for you up there by this time. We had an extremely sweltering weekend here in the city and although it is somewhat cooler now, the weather is still good.

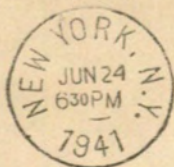

With me, all is as usual. I'm planning on going away for a week or ten days next week. I'm taking a week of my vacation following the 4th of July holiday weekend, so that will give me about ten days. My sister will be away with me for the three day weekend and I'll stay on for the rest of the week. I've decided to go up to Lake Mahopac - the Forest House - as it is near and I think it will serve our purpose. They have tennis and the lake, and there is a golf course nearby, to which they take you. And it is so near, that it will mean very little traveling for my sister for a weekend stay. And besides, it isn't as large as the camps and you know the mob scene every place gets for the 4th. So, I hope we like it and that we have good weather. I'll have another week later in the summer and I can do something else then, which should make the summer go by nicely.

I hope you are feeling better and better and that you will be back to yourself when you leave there. I suppose you fret about your George, but before you know it, you will probably be back in town.

I went to the Stadium last night and heard Paul Robeson - he is a marvelous person and has a magnificent voice. I was also there Saturday and heard Spalding. They have been having some wonderful programs since they opened the season. You'll still have time, of course, to go to a few concerts when you return. Perhaps we will go to one together.

Have a good time and get a good rest. My sister sends best regards with me.

Ruth
